DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to a motor, classified in class 318, subclass 254.
 - II. Claims 8-12, drawn to a servo controller, classified in class 318, subclass 607.
 - III. Claims 13-14, drawn to a servo controller, classified in class 318, subclass 608.
 - IV. Claims 15-25, drawn to a servo controller, classified in class 318, subclass 619.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a motor structure; invention II has separate utility such as a servo controller adjusting frequency; invention III has separate utility such as a servo controller adjusting phase compensation; invention IV has separate utility such as a servo controller adjusting proportional gain. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III, IV; the search for Group II is not required for Groups I, III, IV; the search for Group III is not required for Groups I, II, IV; and the search for Group IV is not required for Groups I, II, III, restriction for examination purposes as indicated is proper.

Art Unit: 2837

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
